A dedicated server is recommended for any web project requiring sole use of the resources a server can provide or which will also be used as game servers. With the dedicated servers at webtropy.com you will receive your own dedicated server. And you also benefit from the latest hardware on the market. You get a dedicated root server with the best performance at an affordable price because we use the particularly powerful XEON CPUs from Intel, combined with DDR4 RAM and SSD hard drives. Your dedicated server is setup and prepared especially for you by the technicians at webtropy.com. Dedicated servers from webtropy.com enable virtualization. You get optimum performance for virtualization of servers with up to 16 vCores and 64 GB DDR4 RAM. With this performance, you can operate multiple virtual machines on one physical server. For virtualization, webtropy.com provides the virtualization software, vSphere from VMware, as well as Proxmox and Hyper-V. Please note that you must conduct for the setup configuration of the virtualization software and that we do not provide that service.
